Coding for Traditional Care Management & Chronic Care Management

Webinar #T4029

DATE AND TIME

April 18, 2017
12:30 - 2:00 p.m. CT

OVERVIEW

There is a large push to reduce the number of unexpected readmissions of patients to the hospitals. Transitional Care Management (TCM) and Chronic Care Management (CCM) are two billable services that can aid in this effort. Even though payment can be made for these services, many practices find that the guidelines for capturing these services can be a bit unclear at times.

During this session, we will help you navigate through the coding and billing guidelines for these services. Earn some much needed reimbursement by ensuring that you meet the documentation and billing guidelines.

TARGET AUDIENCE

Physicians, nurses, compliance officers, administrators, COOs, medical staff, medical coders, medical billers, coding consultants, medical coding auditors, practice managers, office managers, billing managers, and others involved in the revenue cycle management process at health care institutions.

OBJECTIVES

1. Define Transitional Care Management (TCM) and Chronic Care Management (CCM).
2. Discuss the CPT(r) guidelines required to report CCM and TCM codes.
3. Examine medical necessity and the role it plays in accurate capture of TCM services.
4. Identify ways to determine if your patients may benefit from CCM services.
5. Identify which provider-types may offer TCM services.
6. Discuss several challenges to accurate capture of CCM and TCM services.

FACULTY

Catrena Smith, CCS, CCS-P, CPC, CPC-1, CRC, CHTS-PW
President
