

QI Residency Program

Improving Outcomes. Ensuring Quality.

NHA Nebraska
Hospital
Association

AXIS
Medical Education

This educational activity is jointly provided by AXIS Medical Education and the Nebraska Hospital Association.

Introduction

Dear Health Care Leaders,

The Quality Improvement Residency Program was developed as a result of the vision and support of the Rural Quality Improvement Steering Committee.

The Rural Quality Improvement Steering Committee is a group of thought leaders who work together to provide the framework for developing, supporting and promoting top quality initiatives throughout the state of Nebraska. The Rural QI Steering Committee represents engaged hospital quality leaders, the Nebraska Office of Rural Health, Prairie Health Ventures, CAPTURE Falls, Nebraska Coalition of Patient Safety, Nebraska Association of Quality, Risk and Safety (NAHQRS) and the Nebraska Hospital Association.

In 2018, the Nebraska Rural QI Steering Committee determined the need for a rural quality improvement residency program. This program is intended to serve as an introductory course for novice quality leaders or those interested in working in hospital quality. The objective of this program is to provide a collaborative learning environment focused on mentoring and networking for hospital quality personnel to develop empowered statewide leaders.

The NHA thanks the members of the Rural QI Steering Committee, program speakers and content contributors for their valuable input.

Sincerely,

A handwritten signature in black ink that reads 'Margaret Brockman'.

Margaret Brockman, Chair
NHA Rural QI Steering Committee

Program Objectives

At the end of this program, participants will be able to:

- Define of quality and performance improvement.
- Explain how quality fits into the bigger picture of rural hospitals.
- Prepare to lead your hospital through a successful regulatory inspection armed with current information on surveys and accreditation.
- Outline approaches to complete mandatory external data reporting requirements.
- Describe best practices related to determining and driving quality and performance improvement in your hospital.
- Differentiate beneficial vs not beneficial health care data that should be used to analyze and drive performance improvement.
- Analyze health care data reports for the purpose of educating executive team, physicians, frontline staff and board of directors.
- Adapt patient safety tools in your hospital.
- Employ risk management techniques in your hospital.
- Employ patient and family engagement and emergency management tools and techniques.
- Describe the role of quality and performance improvement specific to medical staff functions.
- Adapt quality infection prevention plans in your hospital.
- Articulate population health promotion and continuum of care activities needed in your hospital, to adapt to the changing health care reimbursement structure.

Quality Improvement Residency Program Overview

The NHA Quality Improvement (QI) Residency Program's objective is to provide a collaborative learning environment focused on mentoring and networking for hospital quality personnel to develop empowered, statewide leaders.

This program consists of five, two-day training modules every other month (March to November) for 9 months, and a one-hour touch base with a mentor to follow-up on assignments during opposite months.

Intended audience includes those new to the responsibility or interest in:

- Quality and Performance Improvement
- Accreditation and Survey Compliance
- Medical Staff Quality Initiatives
- Data Reporting
- Risk Management
- Infection Control
- Patient Safety
- Board Governance

Residency Capstone

All Quality Residents will be required to complete a quality-specific capstone and present their work at graduation. The quality project should be specific to their own hospital and/or department needs. This capstone project will allow quality residents to implement learning from the program. Students are encouraged to use program speakers, mentors and class peers as advisors in their capstone.

See requirements below:

- Select quality project specific to your hospital
- Obtain CEO approval for project
- Design your project framework utilizing the Institute for Healthcare Improvement (IHI) model for improvement <http://www.ihl.org/resources/Pages/HowtoImprove/default.aspx>.
- Provide an oral presentation on the final day of residency. Residents may be asked to share learnings at the NHA Quality Conference as an additional option.

Mentorship

The Rural QI Steering Committee has partnered with the Nebraska Association of Healthcare Quality Risk and Safety (NAHQRS) to provide all residents with a mentor. Your mentor is an experienced Nebraska quality professional who works in the healthcare quality field. As the mentee, you are expected to schedule bi-monthly calls with your mentor to touch base, seek clarifications and developed statewide quality resources. Your mentor has agreed to be a point of contact throughout the residency program and for the year following. All speakers have also agreed to be subject matter expert resources for our residents.
