CMS Hospital Restraint & Seclusion: Navigating the Most Problematic CMS Standards & Proposed Changes

Webinar #T5047

DATE AND TIME

May 8, 2018
9:00 - 11:00 a.m. CT

OVERVIEW

Restraint and seclusion is a “hot spot” with both CMS and the Joint Commission, and a common area where hospitals are cited for being out of compliance. The restraint policy is one of the hardest to write and understand in health care today. This session will help simplify the CMS 50-page interpretive guidelines. It will also provide a crosswalk to the Joint Commission standards.

Sue Dill Calloway will discuss the requirements for an internal log and what must be in the log for patients who die in one or two soft wrist restraints, and will include what must be documented in the medical record as well. She will also discuss the reporting requirements for patients who die within 24 hours of being put in restraints.

TARGET

All nurses and physicians with direct patient care, CMOs, CNOs, COOs, nurse educators, risk managers, patient safety officers, PI directors, TJC coordinators, quality directors, hospital legal counsel, compliance officers, accreditation and regulation staff. Others that should attend include staff who remove and apply them as part of their care such as radiology techs, ultra sound technologists and transport staff.

OBJECTIVES

1. List what a hospital must document in the internal log if a patient dies within 24 hours of being restrained with two soft wrist restraints.
2. Discuss the CMS requirement in which all physicians and other staff who order restraints must be educated on the hospital policy.

3. Describe the CMS restraint education requirements for staff.
4. Discuss the specific items CMS requires be documented in the medical record for the one hour face-to-face evaluation on patients who are violent and or self destructive.

FACULTY

Sue Dill Calloway, President

Patient Safety and Health Care Education and Consulting

Sue Dill Calloway has been a nurse attorney and consultant for more than 30 years. She was previously the chief learning officer for the Emergency Medicine Patient Safety Foundation. She has conducted many educational programs for nurses, physicians, and other health care providers. Sue Dill Calloway has authored over 100 books and numerous articles. She is a frequent speaker and is well known across the country in the areas of health care law, risk management, and patient safety. Presenter has no real or perceived conflicts of interest that relate to this presentation.
