

Healthcare Connect Fund: NHA Connectivity Consortium

October 20, 2020 9:00 – 10:00 am CT

NHA Services, Inc. has partnered with the Federal Funding Group to establish the NHA Connectivity Consortium to assist NHA member hospitals with the application process for the Healthcare Connect Fund. Please join us for a **free** webinar on October 20, 2020 to learn how your hospital or health system can leverage FFG's extensive program experience to maximize available funding opportunities while minimizing the administrative burden on your facility. More dollars are available to consortium applicants.

Nebraska's 2019 subsidy filings revealed a very small amount of hardware was filed for the entire State. An analysis of the 2019 participation applications revealed no other 'Consortium only' Eligible Services were filed for. A lot of money is being left on the table. The NHA Connectivity Consortium will deliver a comprehensive approach to the USAC program which will deliver the maximum amount of funding available for every health care provider.

Unique benefits for NHA members include:

- Large scale funding for capital projects (i.e., fiber builds, eligible network equipment)
- Certain urban hospitals/health systems are eligible for additional funding (data centers and administrative sites)
- Firewall managed services and equipment
