

Population Health and the Move from Volume to Value: Retooling the Care Delivery Process to Produce Higher Value

Webinar #T3080

DATE AND TIME

October 25, 2016
9:00 - 10:30 a.m. CT

OVERVIEW

Hospitals and healthcare providers can only start the move from volume to value by changing payment methodologies and reorganizing providers into new structures. In order to truly produce higher value (quality per unit of cost), providers will have to actually re-tool the care delivery system so that it reliably produces high quality in a cost efficient manner. This webinar will describe a systematic approach, known as the Care Process Design System (CPDS), to driving high-value care delivery. The CPDS uses tested methodologies and technologies to design care processes, measure outcomes (quality and cost) and use those outcomes to practice data-driven process improvement.

TARGET AUDIENCE

Hospital executives, legal counsel and government affairs personnel, operations (especially outpatient department managers), facility planners, as well as physicians and non-physician practitioners providing professional services in provider based hospital outpatient departments.

OBJECTIVES

1. Describe the methods and technologies used within the Care Process Design System (CPDS).
2. Explain why outcomes rather than process measures can best be used to drive care process improvements.
3. Define time-driven, activity-based, cost accounting and why it is the best cost accounting method to use in health care.
4. List common care processes and procedures for which the CPDS might be applied in your organization.
5. Discuss why the CPDS can be important in preparing providers to accept bundled payments.

FACULTY

Ellis "Mac" Knight, MD, Senior VP and CMO
Coker Group

Mac Knight is senior vice president and chief medical officer of Coker Group. Prior to joining Coker, Dr. Knight served as the chief physician and clinical integration officer for Palmetto Health in Columbia, South Carolina, where he oversaw Palmetto Health's employed physician network and helped to develop and manage their clinical integration program – The Palmetto Health Quality Collaborative. Prior to that, he was Palmetto Health Richland's vice president for medical affairs. Dr. Knight oversees Coker Group's hospital strategy and operations services and serves as Coker Group's chief medical officer. He has a special interest and expertise in population health management, clinical care process design, cost accounting and hospital – physician integration.

PRICE

\$195 per connection.

Note: The fee is for one phone line with unlimited participants. For example, 10 employees can participate for only \$19.50 ea!
