

# HOSPITAL INCIDENT COMMAND SYSTEM (HICS) TRAINING

COMPLIMENTARY NHA MEMBERS-ONLY EVENT

Join us for these learning opportunities focusing on the real-world integration of ICS into the health care setting. These courses have been designed to enhance your understanding of the HICS structure, implementation to manage incidents, and the roles and responsibilities associated – whether operations-focused or executive level. You'll explore real-world scenarios, learn incident command procedures and participate in open discussions.

## Operations Level

### Implementing the Basics at the Operational Level

In the face of disruptions ranging from natural disasters to cyberattacks, from global pandemics to supply chain disruptions, healthcare organizations must have operational level staff who can implement the tactics needed to steer their organization through turbulent waters. Ensure that your operational level staff are equipped with the knowledge and skills required to navigate a crisis at the operational level.

## Executive Level

### Implementing the Basics at the Executive Level

In the face of disruptions ranging from natural disasters to cyberattacks, from global pandemics to supply chain disruptions, healthcare organizations must have leaders who can steer them through turbulent waters with confidence and clarity. Ensure your executives have the foundational knowledge and skills to navigate any crisis seamlessly.
